

## Client's Reference

BD Medical are a Global Leader in the medical devices and life sciences sectors, with operations in over 100 countries employing more than 65,000 Associates. BD Medical opened a shared services center in Wroclaw Poland in 2012, and this has seen exponential growth ever since. This necessitated the leasing and fitting out of temporary office facility while we secured the lease on the new "BD Building". We retained the services of Sarna Architekci Sp. z o.o. Sp.k. to support our initial temporary office fit out. This project was scoped, sourced and completed in less than 14 weeks, and were instrumental in the success of this venture.

We subsequently retained Sarna Architekci Sp. z o.o. Sp.k. to complete the design and specialist fit out works for the new BD office in Wroclaw, which opened in May 2017. This office, with more than 500 workstations, provides an innovative and multifunctional work environment and has helped significantly with the growth of the BD employer brand in the Wroclaw region.

BD are developing a Global Research & Development Center in Limerick, Ireland and we again retained the services of Sarna Architekci Sp. z o.o. Sp.k. to help us create an innovative and inspiring workplace. The end result could not have been better. Sarna Architekci Sp. z o.o. Sp.k. provide innovative solutions, meeting, and often exceeding, the Client's brief, while always working to strict budgetary guidelines. They are a perfect design partner for BD Medical and we can't recommend them highly enough.
